Supervisor

Professor Charis Thompson

Please summarise your research question in no more than three sentences.

How Chinese colleague students think about controversies part of Chinese social credit system? What are their attitudes towards Chinese social credit system? Why they have those attitudes?

Data collection

Briefly describe the data that will be used, including any secondary sources, noting content, coverage, cost, availability, and terms of use.

The data that i will use is primary data which is collected from interview and questionnaire.

Informed consent and anonymisation of primary research data

If you are collecting primary data, describe your process of obtaining informed consent.

At first, I will go to one Chinese inversion and ask some students whether they are willing to do an interview about Chinese social credit system. After doing some interviews, I will make a questionnaire based on these interviews results and ask some college students do this questionnaire.

If you are collecting primary data that can identify living individuals, how will you anonymise that data to prevent identification?

When I interview my interviewees, I will not ask their real names and I will not add any information about their personal indentification in my disseratation. I will not add questions about personal information in my questionnaires. After I finish my research, I will delete all of those data to protect their privacy.

Research ethics

Does your research involve human participants (living or dead), or involve data about directly identifiable human subjects?

- Yes

Storage and back-up

How will data be stored and backed up during the research? How will you manage access and security? Is the size of your data likely to be a problem?

The research data will be safely saved in my own computer that I'm the only person who have access. Using passwords are required to open my computer and open the folder of research data. The size of my data will not be a problem.
